

Our awareness activity and education program starts with an engaging and informative immersive talk. Following the talk, prepare to be awestruck as you have the chance to meet an individual elephant up close.

Embark on a unique 20-minute elephant walk after the interaction with the Ambassador herd, accompanied by experienced handlers, and you will have the opportunity to observe the elephants in a more natural setting. Children under 10 may not join the walk but proceed with the guide to the viewing platform

After your walk, unwind on our viewing deck with refreshing beverages. As you watch the herd at play, socializing, or splashing about in the water, our knowledgeable staff will be on hand to answer your questions and share fascinating facts about elephant behavior and **eleCREW's** conservation efforts.

This unforgettable encounter will create a lasting memory and foster a sense of connection with these majestic creatures.

The **eleCREW** vision is of an Africa in which elephants and humans coexist in a balanced environment. We care for 9 unique elephants, the Ambassador herd, for whom release into the wild is fraught with dangers. We ensure their ongoing care through our team of wildlife vets, animal psychologists, elephant carers & researchers with decades of experience.
